Quick Introduction

Most of this material is from Prof. Andrew Ng'and Chang's slides

Artificial Intelligence (AI)

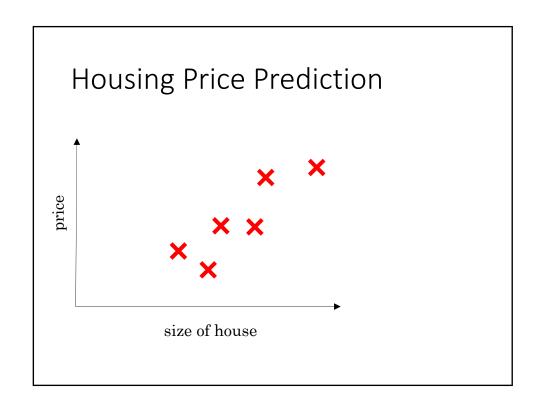

- Al is the new Electricity
- Electricity had once transformed countless industries: transportation, manufacturing, healthcare, communications, and more
- AI will now bring about an equally big transformation

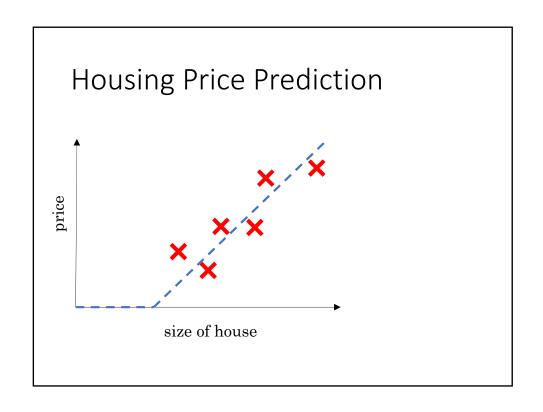

What you'll learn in this course

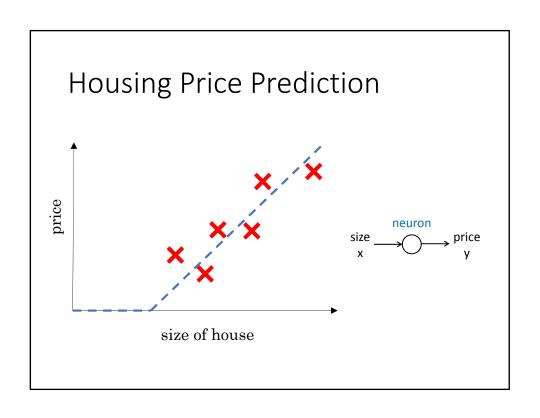

- 1. (Artificial) Neural Networks and Deep Learning
 - The foundations of neural networks
 - How to build a (deep) neural network
 - How to train it on data
 - Build a deep neural network to recognize (e.g., cat images)
- 2. Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization
 - The practical aspects of deep learning
 - How to actually get the neural network to perform well

What you'll learn in this course

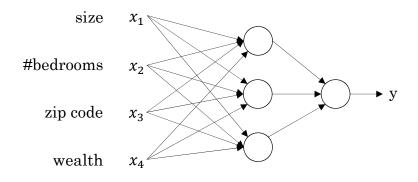

- 3. Structuring your Deep Learning Practices
 - Strategy for building a machine learning system
 - Switch your data into train/dev/test sets
 - End-to-end deep learning
- 4. A Variety of Deep Learning Models
 - Usually applied to images and texts

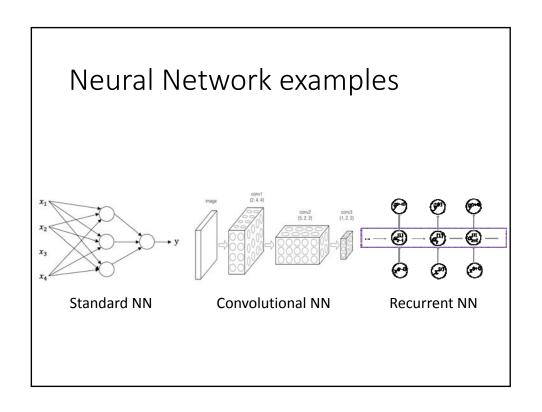

Housing Price Prediction

Supervised Learning

Input(x)	Output (y)	Application
Home features	Price	Real Estate
Ad, user info	Click on ad? (0/1)	Online Advertising
Image	Object (1,,1000)	Photo tagging
Audio	Text transcript	Speech recognition
English	Chinese	Machine translation
Image, Radar info	Position of other cars	Autonomous driving
